

F a c i n g O u r **FUTURE**

## MEDIA ADVISORY

Immediate Release Information – April 21, 2013

### *Facing Our Future* 2013 Report

#### “Infrastructure Investments Necessary for Economic Success”

The *Facing Our Future* report, “Infrastructure Investments Necessary for Economic Success” ([www.facingourfuture.org](http://www.facingourfuture.org)) is released effective April 21, 2013. A media Q&A will be held via conference call on Monday, April 22 at 2PM. The conference line info is 866-740-1260, pc 7427782.

## SUMMARY INFO

The report, “Infrastructure Investments Necessary for Economic Success”, is the third in a series of important public policy reviews and recommendations undertaken by *Facing Our Future* and builds upon a growing public awareness of the role that infrastructure plays in our daily lives. The report is an independent, objective and non-partisan analysis that emphasizes the choices – priorities – that New Jersey must face, and recognizes that New Jersey citizens must view infrastructure investments in totality rather than as discrete transactions.

This report differs from other studies and reports; *it isn't only about numbers – it is about how we as citizens collectively envision our future and how we need to rethink current priorities to ensure that future and our economic success.* New Jersey has deferred investment in its utilities systems, roads and bridges, public transportation and water supply systems – and those systems have decayed. Sandy exposed and highlighted these existing problems. Today, we are forced to face our infrastructure deficiencies now, and to act with urgency.

*Facing Our Future* is volunteer, non-profit and bipartisan effort, led by a Leadership Group of nearly twenty former government executives and public servants. We encourage you to read the report ([www.facingourfuture.org](http://www.facingourfuture.org)), and engage in the dialogue about how to rethink government for our state's long-term economic success.
